

I am applying for the Global Korea Scholarship (GKS) because it is more than financial support. It is an opportunity for growth through education, cultural exchange, and personal development. Through this scholarship, I hope to receive high-quality education and training in leading Korean companies to gain strong practical experience. Learning the Korean language will also help me integrate into Korean society and understand its culture deeply.

My long-term goal is to become a software engineer who can create innovative projects and provide useful solutions for my community. I also want to contribute to developing technology in Yemen, where the number of programmers is still limited. I dream of building a bridge between Yemen and Korea through technology and innovation, sharing knowledge, opportunities, and digital growth between the two countries.

This goal comes from my experience in self-learning technology, school projects, and seeing innovations at events like the LEAP exhibition in Riyadh. I saw Korean and international companies showcasing their AI and programming technologies. This inspired me to improve my skills, learn from global standards, and understand how technology works in real life. I believe that combining technical innovation with human values is the best way to make real and lasting change.

I am confident that studying in South Korea through the GKS program will be a very meaningful experience. Korean people are known for their determination, openness, and respect for other cultures, and I am excited to learn from these values. Being accepted into this scholarship will not only help me achieve my academic goals but will also start a long journey of learning, creativity, and making change on a global level.

Through this experience, I hope to learn new skills in programming and technology, develop my teamwork and critical thinking abilities, and find creative ways to solve problems. I also hope to use what I learn in my future projects to create practical and sustainable technological solutions that serve my community.
